

Izvještaj – Online konferencija povodom Svjetskog dana zaštite i zdravlja na radu

28.04.2020.

Međunarodna organizacija rada (ILO) proglasila je 28. april Svjetskim danom zaštite i zdravlja na radu. Od 1996. godine se ovaj dan u 120 zemalja svijeta obilježava kao međunarodni dan sjećanja na poginule radnike pod motom „Sjetimo se mrtvih, borimo se za žive“. Navedeni datum je odabran kao uspomena na 28 smrtno stradalih u nesreći na radu na gradilištu, u saveznoj državi Connecticut u SAD-u. Poseban naglasak se stavlja na prevenciju povreda na radu i profesionalnih oboljenja.

Kako bismo, uprkos trenutnoj situaciji uzrokovanoj pandemijom COVID-19, obilježili ovaj dan i podsjetili se svih žrtava na radu u prethodnoj godini, a posebno odali počast i priznanje svim ljekarima i ostalim medicinskim radnicima koji su posljednjih mjeseci izgubili živote na svojim radnim mjestima širom svijeta, organizovali smo online konferenciju preko Zoom aplikacije.

Cilj je bio da svi učesnici kažu nešto o aktuelnoj situaciji iz svog ugla, odnosno o zaštiti i zdravlju na radu u vrijeme korone, a svi zainteresovani koji se priključe, mogli su postaviti pitanja ili dati komentare.

Tom prilikom, panelisti su bili:

Koordinatorica projekta Đina Janković, koja je ujedno bila i moderator konferencije,

potpredsjednik UZNRCG Brano Šebek,

nacionalna koordinatorica MOR-a za Crnu Goru Nina Vujović Krgović,

direktorica WHO za CG Mina Brajović,

nacionalni koordinator MOR-a za Srbiju Jovan Protić,

inspektor zaštite i zdravlja na radu Zlatko Popović,

načelnica Direkcije za poslove zaštite i zdravlja na radu Danijela Šuković,

predsjednik makedonskog udruženja za zaštitu i zdravlje na radu MOSHA Milan Petkovski,

predstavnik USSCG Ivana Mihajlović,

i predstavnik SSCG Vladimir Krsmanović.

Panelisti su govorili o aktuelnoj situaciji, izazovima pred kojima su se našli poslodavci i zaposleni, odnosno o zaštiti i zdravlju na radu u vrijeme korone. Podsjetili su prisutne da nakon korone ništa više neće biti isto, a da li će ova situacija doprinijeti promjeni navika i podizanju svijesti o zaštiti i zdravlju na radu svih nas, ostaje da se vidi.

Naglašeno je da svi poslodavci moraju inicijalno izvršiti procjene rizika i obezbijediti uslove da njihova radna mjesta prethodno ispunjavaju stroge kriterijume zaštite i zdravlja na radu, kako bi se minimizirao rizik od izloženosti COVID -19..

Mjere kontrole moraju biti posebno prilagođene potrebama onih zaposlenih koji su na prvoj liniji izloženosti pandemiji, a tu spadaju zdravstveni radnici, medicinske sestre, ljekari i zaposleni u hitnoj pomoći, kao i oni koji se bave prodajom prehrambenih namirnica kao i poslovima održavanja i čistoće.

Naglašeno je i da je potrebno fokusirati se i na potrebe najugroženijih zaposlenih i preduzeća, posebno onih u neformalnoj ekonomiji, migranata i onih koji rade od kuće. Mjere zaštite ovih zaposlenih treba da obuhvate edukaciju i obuku o bezbjednim i zdravim radnim praksama, besplatno obezbjeđivanje lične zaštitne opreme shodno potrebi, pristup javnim zdravstvenim uslugama i pružanje informacija o alternativama u vezi sa troškovima života.

Pandemija COVID-19 ukazala je na hitnu potrebu za snažnim nacionalnim programima za zaštitu i zdravlje na radu zdravstvenih radnika, medicinskih profesionalaca, zaposlenih u hitnoj pomoći i ostalih zaposlenih koji izlažu svoje živote svakodnevnom riziku

Da bi se osigurao bezbjedan povratak na posao i izbjegla dalja obustava rada, preporuka je bila:

- Mapiranje opasnosti i procjena rizika od zaraze u odnosu na sve poslovne operacije i nastavak procjena po povratku na posao.
- Usvajanje mjera za kontrolu rizika prilagođenih svakom sektoru i specifičnostima svakog radnog mjesta i zaposlenih. One mogu da uključuju:
- Smanjivanje fizičkih interakcija između zaposlenih, izvođača, klijenata i posjetilaca uz poštovanje načela fizičkog distanciranja kada se dogodi bilo kakva interakcija.
- Unapređenje ventilacije na radnom mjestu.
- Redovno državanje površina, vodeći računa da su radna mjesta čista i higijenski istretirana, kao i da pružaju mogućnosti za pranje ruku i sanitarnu zaštitu.
- Obezbjeđivanje lične zaštitne opreme zaposlenima gdje je to potrebno i to potpuno besplatno.
- Organizacija izolacije slučajeva sumnjivih na COVID-19 i pronalaženje svakog povezanog kontakta.
- Pružanje podrške mentalnom zdravlju osoblja.
- Obezbjeđivanje obuke, edukacije i informativnog materijala o zaštiti i zdravlju na radu, uključujući pravilne higijenske prakse i upotrebu bilo koje od omogućenih mjera kontrole na radnom mestu (uključujući ličnu zaštitnu opremu).

Na konferenciji je bilo 47 učesnika iz čitavog regiona. UZNRCG je u saradnji s MOR-om pripremio postere i upitnike koji su podijeljeni brojnim poslodavcima u Crnoj Gori, a sve u cilju što uspješnije borbe i odgovora na COVID-19.

Brojni mediji su prenijeli izvještaj sa ovog događaja.

Report – Online conference on the World Day for Safety and Health at Work

April 28th 2020

The International Labor Organization (ILO) has declared April 28th the World Day for Safety and Health at Work. Since 1996, this day has been celebrated as an international day in 120 countries around the world, in memory of those who died in their workplaces, under the motto "Remember the dead, fight for the living." The date was chosen to commemorate the 28 fatalities at work on a construction site in the state of Connecticut in the United States. Special emphasis is placed on the prevention of injuries at work and occupational diseases.

Despite the current situation caused by the COVID-19 pandemic, in order to mark this day and remind ourselves of all the victims at work in the previous year, and especially to pay tribute and recognition to all the doctors and other medical professionals who have lost their lives in their workplaces around the world in the recent months, we organized an online conference via the Zoom app.

The goal was for all the participants to share something about the current situation from their point of view, that is, about safety and health at work in the times of corona, and all interested participants who joined, could ask questions or give comments.

The panelists were:

The Project Coordinator Djina Jankovic, who was also the conference moderator,

The Vice-President of SWAM Brano Sebek,

The National Coordinator of ILO for Montenegro Nina Vujovic Krgovic,

The Director of WHO for Montenegro Mina Brajovic,

The National Coordinator of ILO for Serbia Jovan Protic,

Inspector for Safety and Health at Work Zlatko Popovic,

Head of the Directorate for Occupational Safety and Health Danijela Sukovic,

The President of the Macedonian Occupational Safety and Health Association MOSHA Milan Petkovski, representative of the Union of Free Trade Unions of Montenegro Ivana Mihajlovic, and the representative of the Trade Unions of Montenegro Vladimir Krsmanovic.

The panelists spoke about the current situation, the challenges the employers and the employees face, in terms of the safety and health at work in the times of corona. They reminded the participants that nothing would be the same anymore after corona, but it remains to be seen whether the current situation will contribute to the change of habits and our awareness of safety and health at work.

It was emphasized that all employers must perform an initial risk assessments and provide that the conditions of their workplaces meet a strict criteria of safety and health at work, in order to minimize the risk of exposure to COVID -19.

Control measures must specifically be tailored to the needs of those employees who are in the first line of exposure to the pandemic, which includes health workers, nurses, physicians and emergency workers, as well as those who sell groceries and those who work in maintenance and cleanliness.

It was also emphasized that it is necessary to focus on the needs of the most vulnerable employees and companies, especially those in the informal economy, migrants and those who work from home. Measures to protect these employees should include education and training on safe and healthy work practices, free provision of personal protective equipment, access to public health services and the provision of information on cost-of-living alternatives.

The COVID-19 pandemic highlighted the urgent need for strong national programs for safety and health at work of health workers, medical professionals, employees in the emergency and other employees who put their lives at daily risk.

To ensure a safe return to work and to avoid further work stoppages, the recommendations were:

- Hazard mapping and infection risk assessment in relation to all business operations and follow-up assessment upon return to work.
- Adoption of risk control measures tailored to each sector and the specifics of each workplace and employees. These may include:
 - Reducing physical interactions between employees, contractors, customers and visitors, along with respecting the principles of physical distancing when any interaction occurs.
 - Improving ventilation in the workplace.
 - Regular maintenance of surfaces, keeping the workplaces clean and hygienically treated and have hand washing and sanitation provided.
 - Providing personal protective equipment to employees where necessary and completely free of charge.
 - Organizing the isolation of cases suspected of COVID-19 and finding any related contacts.
 - Providing support to the mental health of the staff.

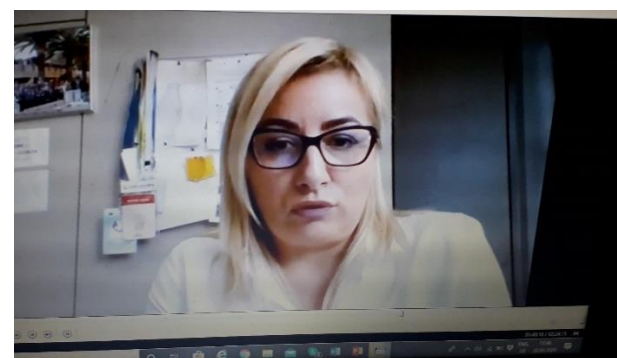

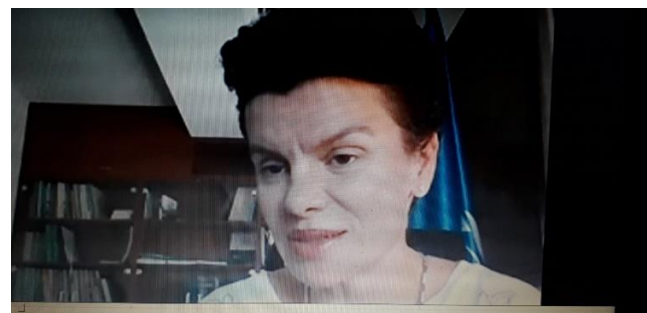

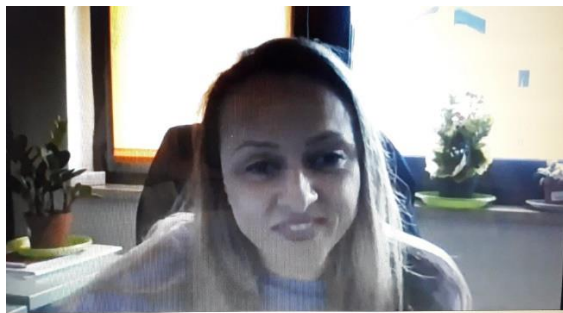

- Providing training, education and information material on occupational safety and health, including proper hygiene practices and the use of any of the available control measures in the workplace (including personal protective equipment).

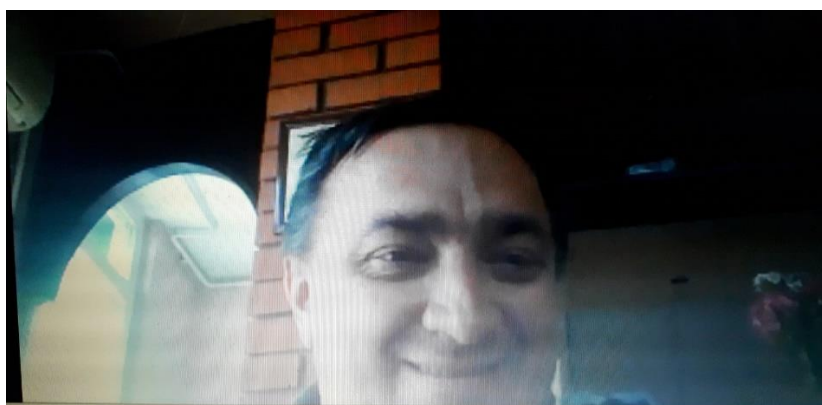

The conference was attended by 47 participants from across the region. SWAM prepared posters and questionnaires, in cooperation with ILO, which were distributed to numerous semi-suppliers in Montenegro, all with the aim of a more successful fight and response to COVID-19.

Numerous media reported on this event.
