

Izvještaj – Online seminar za koordinatore 16.07.2020. Hotel CentreVille

Udruženje zaštite na radu Crne Gore je u saradnji sa Ministarstvom rada i socijalnog staranja i Upravom za inspekcijske poslove, održalo online seminar 16.jula 2020. godine, na temu koordinatora za zaštitu i zdravlje na radu na gradilištu – u fazi projektovanja i u fazi izvođenja radova. Privremena i pokretna gradilišta su mjesta na kojima dolazi do najvećeg broja smrtnih i teških povreda na radu, a građevinski poslovi se svrstavaju među najrizičnije. Uvođenjem obaveznog imenovanja koordinatora K1 i K2, očekuje se veća i efikasnija primjena mjera zaštite na radu, u skladu s propisima, a time i smanjenje broja povreda.

Učesnici seminara su bili inspektori rada za oblast zaštite i zdravlja na radu, zaposleni u Direkciji za poslove zaštite i zdravlja na radu i članovi Udruženja zaštite na radu CG (među kojima su CEDIS, CGES, Decom, Montinspekt, Tehno-control, IngInspekt, Institut Sigurnost, Montecontrol i Institut za crnu metalurgiju). U uvodnom dijelu, prisutnima su se obratili Zlatko Popović - Inspektor rada I za oblast zaštite na radu, samostalne savjetnice iz Ministarstva rada i socijalnog staranja Jovana Bošković i Maja Mijović, projektna koordinatorka Đina Janković i predsjednik UZNRCG Zdenko Janković, kao i nacionalna koordinatorka MOR-a Nina Krgović.

Cilj seminara je bio da učesnici dobiju esencijalne informacije iz teorije i prakse sa aspekta koordinatora za zaštitu i zdravlja na radu na gradilištima, iz zemalja regiona. Svoja iskustva su sa prisutnima, preko Zoom-a, podijelili Slavko Krištofelc - direktor Inspekcije nadzora varnosti in zdravja pri delu Republike Slovenije, Goran Baroš - voditelj Službe za nadzor zaštite na radu na radilištima i u rizičnim djelatnostima u Središnjem uredu Državnog inspektorata Republike Hrvatske i Jovan Protić – Nacionalni koordinator MOR-a u Republici Srbiji. Akcenat je bio na zakonskim obavezama investitora i izvođača radova, sa posebnim osvrtom na određivanje koordinatora i broju gradilišta po koordinatoru, izradi Planova mjera na gradilištu, načinu polaganja i pripremi kandidata za polaganje stručnog ispita za K1 i K2, kao i nadležnostima i odgovornostima koordinatora.

Zaključeno je da se sve zemlje regiona suočavaju sa manje-više istim problemima, a kako bi se u narednom periodu odgovorilo izazovima u ovoj oblasti na adekvatan način, neophodno je imati u vidu iskustva susjeda. Posebnu pažnju i napor je potrebno uložiti u obuke i konntinuiranu edukaciju budućih koordinatora, a istovremeno usmjeriti zajedničke aktivnosti na suzbijanje rada na crno, uvođenje umreženog sistema za evidentiranje povreda i jačanje sistema osiguranja. Iako su gradilišta privremena - smrtni slučajevi i teške ozljede koje tamo nastaju, ostavljaju trajne posljedice po zaposlene i njihove porodice.

Report – Online Seminar for Coordinators

July 16th 2020 Hotel CentreVille

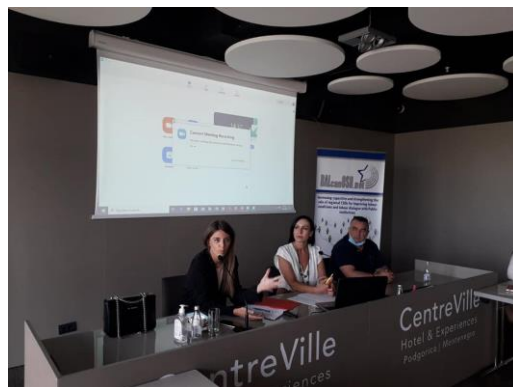

The Safety at Work Association of Montenegro organized an online seminar on July 16th 2020, in cooperation with the Ministry of Labor and Social Welfare and the Administration for Inspection Affairs, on the topic of safety and health coordinators on construction sites – in the project phase and the construction phase. Temporary and mobile construction sites are the places where the highest number of deaths and severe occupational injuries occur, and construction work is among the most risky jobs. By introducing mandatory appointment of K1 and K2 coordinators, a greater and more efficient application of protection measures is expected, in accordance with the regulations, and thus a reduced number of injuries.

The participants of the seminar were labor inspectors for the field of safety and health at work, representatives of the Directorate for Occupational Safety and Health and members of the Safety at Work Association of Montenegro (among whom are CEDIS, CGES, Decom, Montinspekt, Tehno-control, IngInspekt, Institut Sigurnost, Montecontrol and the Institute of Ferrous Metallurgy). In the introductory part, Zlatko Popovic - Labor Inspector for the field of occupational safety, independent advisors from the Ministry of Labor and Social Welfare Jovana Boskovic and Maja Mijovic, Project Coordinator Dina Jankovic, the President of SWAM Zdenko Jankovic, as well as the national coordinator of ILO Nina Krgovic, spoke to the participants.

The aim of the seminar was for the participants to obtain essential information on both theory and practice of the coordinators for safety and health at work on construction sites, from the countries of the region. Slavko Kristofelc - Director of the Safety Supervision Inspection of Occupational Health of the Republic of Slovenia, Goran Baros - Head of the Occupational Safety and Health Supervision Service at construction sites and in risky activities in the Central Office of the State Inspectorate of the Republic Of Croatia and Jovan Protic – the ILO National Coordinator in the Republic of Serbia, all shared their experiences with the participants. The emphasis was put on legal obligations of investors and contractors, with special reference to the determination of coordinators and the number of construction sites per coordinator, the development of Plans of measures on the construction site, the means of preparing candidates to take the professional exam for K1 and K2, as well as the competencies and responsibilities of the coordinators.

It was concluded that all the countries in the region face more or less the same issues, and in order to respond to the challenges in this area in an adequate way in the following period, it is necessary to have in mind the experiences of our neighboring countries. Special attention and effort needs to be put in training and continuous education of future coordinators. At the same time, it is important to focus on joint activities on combating unreported employment and introduce a networked system for recording occupational injuries and strengthening the insurance system. Even though construction sites are temporary - deaths and severe injuries that occur there, leave lasting consequences for the employees and their families.
